Subject Index

At each entry, the following information is given: English title, subject and branch codes, serial number.

Insurance Mathematics

***M00:* GENERAL AND MISCELLANEOUS**

The methodology of Actuarial Science 263001
The Actuarial Role in Financial Reporting 263002
To sustain a vital and Vibrant actuarial Profession 263003
Growth of the Public Responsibility of Actuaries in Life insurance:
Interview with Barbara J. Lautzenheiser (B10) 263004

***M10:* PROBABILITY THEORY AND MATHEMATICAL STATISTICS IN INSURANCE**

Non-parametric likelihood enhancements to parametric graduations 263005
Modelling the DEM/USD Exchange Rate as an Ergodic Stationary Continuous Time Process 263006
Instability in Co integration Regressions - Further Discussion with an Application to Money Demand in Portugal 263007
Characteristic Functions and Their Application to Risk Processes 263008
Analysis of basic Actuarial Theory for Fixed Premium Variable Benefit Life Insurance (B10) 263009
Calculation of a confidence interval for the number of units with a particular attribute in a finite universe based on a small stratified random sample 263010
The static state of equilibrium of the overall actuarial building savings and loans model 263011
Health Insurance with guaranteed No Claim Bonus (B20) 263012
Gross Premium Calculations and Profit Measurement for Nonparticipating Insurance (M30) 263019
Bonus systems in an open portfolio (M31) 263020
Stochastic Claims Inflation in IBNR (M42) 263022
Stock Return Models for Segregated Fund Guarantees (E50) 263032

***M12:* MODELLING OF PORTFOLIOS AND COLLECTIVES**

A Crisis of Longer Life: Reforming Pension Systems (B10) 263013
The Development of Some Characteristics for Equitable National Retirement Income Schemes (B10) 263014
Cumulative Anti selection Theory 263015
Generation Life Table for Pension Insurance based on a Multiple Decrement Model 263016
An Efficiency Analysis of German Life Insurers - The Best Practice Method 263017

***M20:* NUMERICAL ANALYSIS IN INSURANCE**

A Proposal for integrating Australia's Retirement income Policy (B10) 263018
Valuation of the Reset Option in Segregated Fund Contracts using Quasi-Monte Carlo Methods (E50) 263031

***M30:* PREMIUM**

Gross Premium Calculations and Profit Measurement for Nonparticipating Insurance (M10) 263019

***M31:* EXPERIENCE RATING**

Grossing-Up: Chain-Ladder and Marginal Sum estimation. (M42) 263021
Bonus systems in an open portfolio (M10) 263020

***M42:* LOSS RESERVES (INCL. I.B.N.R.)**

Grossing-Up: Chain-Ladder and Marginal Sum estimation. (M31) 263021
Stochastic Claims Inflation in IBNR (M10) 263022

Insurance Economics

E10: **INSURANCE RELATED MATHEMATICAL ECONOMICS**

The Guaranteed Investment Contract (GIC) 263023

E20: **MACRO-ECONOMIC INFLUENCES**

Regionalisation risk equalisation and competition within the Social Health Insurance System 263026
Investment Returns and inflation Models: Some Australian Evidence 263024
Measures of Actuarial Status for Social Security: A Sequel 263025

E25: **SOCIAL SECURITY**

Pareto Improvements within Social health Insurance by self selection of its Members 263027
Social security - Where Did It Come From and Where Is It Going (E60) 263042

E40: **BUSINESS ECONOMICS**

Developments of Theory of Insurance Business Management 263028

E43: **RISK MANAGEMENT**

Risk and Risk Management as an object of research and a task for Companies 263029
Risk management of Natural Catastrophes - do Mathematical Methods Help? 263030

E50: **FINANCE**

Valuation of the Reset Option in Segregated Fund Contracts using Quasi-Monte Carlo Methods (M20) 263031
Stock Return Models for Segregated Fund Guarantees (M10) 263032
Valuation of Embedded Options in German Life Assurance Contracts 263033
A pricing Model for PCS-Catastrophe-Options 263034
Present Values of Dynamic pension Annuities (B10) 263035
Asset Liability Management of Insurance Companies and Shareholder Value 263036
Early Exercise Options for Guaranteed Equity-Linked Life Insurance Policies 263037

E51: **RATES OF INTEREST**

An actuarial Layman's Guide to Building Stochastic Interest Rate Generators 263038

E60: **SURVEYS**

The use of the Internet as a Means of information-Communication and Marketing in the Insurance Industry 263048
The Society of Actuaries Education and Examination System: 1949-1999 263041
The public Role of Actuaries in Private Pensions in Canada (B10) 263039
The Public Responsibility of Actuaries in American Pensions (B10) 263040
Social security - Where Did It Come From and Where Is It Going (E25) 263042
Supplementary remarks on the formulas of Richttafeln 1998 (B10) 263043
Critical remarks about the Richttafeln 1998 (B10) 263044
Legal Expenses Insurance and the Cost of Litigation 263045
Determinants of the European legal Expenses Insurance Market 263046
Measurement of Service Quality for Insurance Companies 263047
The Interference-provisions of the Insurance Supervisory Authority According to the Austrian Insurance Supervisory Law (VAG) 263049

Insurance Branch Index

B10: **LIFE**

Growth of the Public Responsibility of Actuaries in Life insurance:
Interview with Barbara J. Lautzenheiser (M00) 263004
Analysis of basic Actuarial Theory for Fixed Premium Variable Benefit Life Insurance (M10) 263009
A Crisis of Longer Life: Reforming Pension Systems (M12) 263013
The Development of Some Characteristics for Equitable National Retirement Income Schemes (M12) 263014
A Proposal for integrating Australia's Retirement income Policy (M20) 263018
Present Values of Dynamic pension Annuities (E50) 263035
The public Role of Actuaries in Private Pensions in Canada (E60) 263039
The Public Responsibility of Actuaries in American Pensions (E60) 263040
Supplementary remarks on the formulas of Richttafeln 1998 (E60) 263043
Critical remarks about the Richttafeln 1998 (E60) 263044

B20: **HEALTH**

Health Insurance with guaranteed No Claim Bonus (M10) 263012
